**CLAY PAVERS** 

#### **COLOUR**

Black brown

#### **Product description**

The bricks are formed individually in the unsanded mould to a solid mass, pressed from clay of alluvial origin from an area located in the Scheldt basin and fired in a tunnel oven at a temperature of approximately 1180°C. On the narrow side the bricks have an unsanded surface structure. The shape is slightly irregular. Finally the bricks are processed until they have acquired a weathered shape, due to which the paver surface leaves a rustic, aged impression.

#### **TECHNICAL CHARACTERISTICS**

The paving is laid in fired clay bricks of Belgian origin, quality class A, carrying the CE and UKCA mark.
